PETROLEUM RESOURCES DIVISION

Geological and Geophysical Reports

The attached list of released reports is updated annually, as of June 30th. The list comprises all reports releaseable in accordance with Order-in-Council 1017, approved March 14, 1972. Monthly additions to the list are published in the Drilling and Land Report.

Further information on the reports, for example maps included and areas, can be obtained by examination of the Division's card file, a copy of which is available at Petroleum Information Exchange Ltd., (PIX) in Calgary, Alberta.

The reports are available for examination for a fee at the Division office in Victoria, British Columbia.

Copies of reports, or portions thereof, can be obtained by ordering from the Division in Victoria (604-387-5993). The copies are made at a commerical copy centre, and will be sent, and invoiced, from this company. The size limitation of their Xerox 2080 is 24 inches in width, so that larger maps will be reduced accordingly. If full-size copies are required, please indicate "FULL SIZE" on your orders.
